

January:

Fertilizer: Choose ONE

Winterizer or LCV Yellow (slow) or Organic (Revive or Hou-actinite)

February:

Pre-emergent: (HiYield T&O Weed Stopper) to stop weed & grass seed before spring.

Post-emergent: (Celsius) spot spray winter weed & grass already up before spring >> > this will pay dividends down the road.

March:

Post-emergent: Same as Feb. if winter weeds or grass are still present (Celsius) If excessive broadleaf weeds are present (Weed Free Zone)

Amendments: **Humic** Acid & Gypsum for thatch decomposition as well as calcium and sodium build up from city and well water.

Optional but Recommended Annually for Optimal Results:

Physical Aeration with machine or by hand for small yards

Top dress ½ to ¾” (any Garden Soil no chunks)

April:

Fertilizer: Choose ONE

Organic (Revive or Hou-actinite) or LCV Purple Blend or Green Maker >>> if alkalinity high we recommend using the low nitrogen organics.

Amendments: Soil Acidifier: IronX (this is a must for alkalinity and buildup from our water) this will avoid yellowing or chlorosis.

Post-emergent: Weed Free Zone and/or Sedge Ender/Hammer

Insecticide: if needed (Cyonora or Complete Granule)

May:

Pre-emergent: (HiYield T&O Weed Stopper) to stop weed & grass seed.

Fungicide: **Granule** for preventative maintenance (Infuse or F-Stop)

Insecticide: Complete or Dura Turf for grubs and leaf eaters

June:

Fertilizer: Revive/ Hou-actinite, but stay away from high nitrogen, as your normal Fertilizer will be used again in July.

Post-emergent: If needed Weed Free Zone and/or Sedge Ender/Hammer

Amendments: IronX (important on St Aug.)

July:

Fertilizer: Choose ONE

Organic (Revive or Hou-actinite) or LCV Purple Blend or Green Maker >>> if alkalinity high we recommend using the low nitrogen organics.

Amendments: Soil Acidifier: IronX (this is a must for alkalinity and buildup from our water) this will avoid yellowing or chlorosis.

Post-emergent: Weed Free Zone and/or Sedge Ender/Hammer

Insecticide: if needed (Cyonora or Complete Granule)

August:

Pre-emergent: (HiYield T&O Weed Stopper) to stop weed & grass seed.

Fungicide: Liquid for present fungus or granule for preventative (Infuse or F-Stop or Systemic)

Insecticide: Complete or Dura Turf for grubs and leaf eaters

September:

Fertilizer: Choose ONE

Organic (Revive or Hou-actinite) or LCV Purple Blend or Green Maker

Fungicide: Liquid for present fungus or granule for preventative (Infuse or F-Stop or Systemic)

Insecticide: Complete or Dura Turf for grubs and leaf eaters

October:

Amendments: Humic Acid & Gypsum for thatch decomposition as well as calcium and sodium build up from city and well water.

Optional but Recommended Annually for Optimal Results:

Physical Aeration with machine or by hand for small yards

Top dress ½ to ¾” (any Garden Soil no chunks)

November:

Fertilizer: Winterizer or Revive or Hou-actinite

Pre-emergent : (Dimension) HiYield T&O Weed Stopper

December:

RELAX and have a Great Holiday and New Year

(Unless you missed November Schedule) then just do that here.

Lawn Programs & Services Available:

Basic Lawn & Soil Consult:

\$200.00

We will come to you and do a comprehensive consultation addressing soil structure w/ a 5 Point soil analysis to diagnose or advise remedies for lawn issues that may exist as well as an annual watering schedule to help give you a leg up on a beautiful healthy lawn.

Lawn Maintenance Programs:

Basic Lawn Maintenance Program w/ two Options

This gives you the opportunity to purchase everything you need at one time for your turf type ready to apply to your lawn throughout the year based on our lawn maintenance plan. You can take it with you at purchase or we can store it for you to swing by and pick up when it is time to apply throughout the year. First it comes with savings for upfront purchase on the items you would be purchasing through the year if you were following our program. Secondly it would come with the ease and convenience of not having to check out and pay for each scheduled application. Third and most importantly it will come with a text reminder of exactly what needs to be put down and when.

Option 1: Covers all Bermuda// Bermuda Hybrid// and Tiffs

Option 2: Covers all St Augustine//Fescues or Shade Tolerant

Customized Lawn Maintenance Program

This is our most comprehensive option, which comes with a complete consultation, as well as a customized maintenance plan. It includes all the benefits of the Basic Program but is customized to your lawn, based on your individual turf type, soil type and any specifics that may exist due to water, drainage, etc. You still have the option to pick it up throughout the year or take it all at once.

***Come in to get prices and details on how the lawn programs work. We can discuss the key benefits and see what makes sense for you. They are based on square footage and product prices at the time of purchase.
